

HAMMER MILLS

136 HAMMER MILL

Electric Motor

High Performance

Highly Economical

The BPI 136 Hammer Mill is the biggest Hammer Mill in the BPI range with capacity ranging up to 12 tons per hour. This machine is ideal for feed lots that need to maintain a high production output throughout the day. The 136 has a big intake point with a high milling capacity through multiple hammers and knives. Once the product has been milled to the required size it passes through a screen and into the goose neck chute, which is adjustable for directing the processed product.

STOCK CODE	000A136A01
NUMBER OF HAMMERS	6
