

CULTIVATORS

INTER-ROW CULTIVATOR

Inter-row cultivation

Three-point Linkage

Maximum Efficiency

This series of Inter-row Cultivators can be mounted on the tractor's universal three-point linkage system. These Cultivators are available in different models: 3-, 4-, 5- and 7-unit machines. The main use of this machine includes the cultivation between the rows after the crop has grown up to 400mm in height. The Inter-row Cultivator can be used to apply top-dressing fertilizer, de-weeding and aerating the soil.
