

RIDGERS

RIDGER COMBINATION

Adjustable Discs

Adjustable Blade

Seedbed Preparation

This implement is ideal for final seedbed preparations as it does the work of three implements in a single process which involves the ridge being made by the two adjustable discs, an adjustable blade that levels the ridge top, a roller that breaks clods, leaving a perfectly formed, ready to be planted ridge. Adjustments can be made on the disc (as with the normal disc Ridger) to increase ridge width, height and form.

STOCK CODE	AJP / L	ABB / K	AJP / LR
TYPE	RIDGER WITH BLADE	RIDGER WITH FERTILIZER BIN	RIDGER WITH BLADE / ROLLER
NUMBER OF DISCS	2	2	2
NUMBER OF ROWS	1-ROW	1-ROW	1-ROW
BLADE FOR LEVELING	YES	NO	YES
ROLLER / CRUMBLER	NO	NO	YES
FERTILIZER BIN	OPTIONAL	YES	OPTIONAL
TOTAL WIDTH	2 400mm	1 800mm	2 400mm
TOTAL LENGTH (WITHOUT BIN)	2 400mm (1 300mm)	1 500mm	2 400mm (1 550mm)
TOTAL HEIGHT (WITHOUT BIN)	2 000mm (1 250mm)	1 700mm	2 000 (1 250mm)
WORKING DEPTH	250mm	250mm	250mm
WORKING WIDTH	300 - 1 700mm	300 - 1 350mm	300 - 1 700mm
SPACE BETWEEN RIDGES	ADJUSTABLE	ADJUSTABLE	ADJUSTABLE
DISC DIAMETER	610 / 660mm	610 / 660mm	610 / 660mm
REQUIRED POWER	45 - 50kW	45 - 50kW	55 - 60kW
