

ACCESSORIES

ROTARY CULTIVATOR

Loosens Soil

Mixing Residue

Seedbed Preparation

The Rotary Cultivator (rotavator) saves time, fuel and it lessens soil compaction and wear of the tractor. It accomplishes better seedbeds in the shortest time and leaves the worked soil perfectly leveled. Stubbles and residues of previous crops are chopped into pieces and thoroughly mixed into the soil to form organic compost. Cultivation in any soil condition is done smoothly, quickly and efficiently. The models available range from a 1.2m to a 2.0m.

STOCK CODE	M1.2MRV	M1.5MRV	M1.8MRV	MH2.0MRV
WORKING WIDTH	1 200mm	1 500mm	1 800mm	2 000mm
BLADE SHAFT SPEED	210rpm	210rpm	210rpm	210rpm
NUMBER OF BLADES	24	32	36	48
