Gravel Roads

Adjustable Angle

Three-point Linkage

BPI Grader Blades are mounted to tractors on the three-point linkage system. Grader Blades can be used in various applications that include: making gravel roads, land leveling, opening and filling ditches, dirt race tracks and landscaping. The three-point mechanical models can also be used as a dozer by turning the mouldboard around for repairing ditches for drainage, backfilling holes and trenches. Blades are produced from special steel to prevent corrosion and breaking.
