## TRACTOR MOUNTED FRONT-END LOADER

**Support Bars**

**Dual Purpose**

**Universal Linkage**

The BPI Front-end Loader available for nearly every tractor, large or small, new or old. The long list of standard features include greater dump and roll back angles, enhanced visibility and servicing convenience, more breakout force and easy tool switching. Mounting kits minimises stress on the tractor frame. The majority of mounting kits include support bars to the rear axle and full-length left- and right-side rails.
