

# HARROWS

## ZIG-ZAG HARROW

**Loosens Soil**

**Flexible Frame**

**Seed Covering**

The BPI Zig-Zag Harrows are mainly used to crush clods and to level a seedbed after ploughing. They are used to control weeds and to cover seed or fertilizer that have been sprayed out and can also be used to aerate pastures. Zig-Zag Tine Harrows are characterised by a wide working width and 20 heat treated steel tines per section. Tine Harrows may have rigid or flexible frames as well as rectangular or triangular.
